Liz

I suspect we need help reviewing this one as well. Who will provide technical review? I will read it but it is not really my field.

Ian,

There are two work plans, this is the work plan that covers groundwater, which is the area in which we need assistance. I will send the other work plan to you, for context.

We need to move quickly or else SGC will have completed its work before we get the order out the door.

Paula and Brent,

Attached in two separate emails, you will find investigative work plans prepared by Sunnyside Gold Corporation as part of Sunnyside's continuing participation in the collaborative effort to improve water quality in the Animas River.

Sunnyside requests that you provide any comments that may improve the work plans at your earliest convenience such that adjustments can be made prior to implementation. The airborne geophysical survey, planned for July 20th, distributed earlier is an attachment to the Subsurface Investigation Work Plan. As a result of a comment by Peter Butler Co-Coordinator of ARSG, Sunnyside will also take water quality samples at A-68 and the Howardville Gage on the day of the airborne survey to demonstrate the degree of water quality differential at the time of the

survey.

Implementation of the attached plans except for the airborne geophysical survey is planned for August and September.

I would appreciate it if you would provide comments to me as soon as practicable.

Thanks,

Pat
